The Urban Electoral District consists of the City of Freetown (section 5, of Ordinance No. 38 of 1927) together with the Sherbro Judicial District (Schedule A to Cap. 189).

The Rural Electoral District consists of those parts of the Colony excluding the City of Freetown, which are within the Peninsula of Sierra Leone, together with Tasso Island and the Banana Islands.

The electorate is confined to male British subjects, or natives of the Protectorate capable of reading and writing English or Arabic, of twenty-one years of age, having resided for twelve months in the electoral district in which the vote is claimed.

The property qualifications are : in the Urban Electoral District, ownership or occupation of premises of not less than £10 in value, or receipt of a yearly salary of not less than £100 ; and in the Rural Electoral District, ownership or occupation of premises of not less than £6 in value, or receipt of a yearly salary of not less than £60.

No person is capable of being elected a member of the Legislative Council if he is not twenty-five years of age, if he has been dismissed from the Government Service or debarred from practising as a legal or medical practitioner by a competent authority, or is in the public service of the Colony or Protectorate, or is not registered as an elector. The property qualification for a member is the possession of real or personal property of the value of £250 for the Urban and £100 for the Rural Electoral Districts.

**IMPORTS AND EXPORTS.**

**IMPORTS AND EXPORTS****1936.**  

---

**PREFATORY NOTE.**  

---

**ALL TABLES RELATE TO THE CALENDAR YEAR.**

“IMPORTS FOR HOME CONSUMPTION” includes goods entered for use in the Colony at the time of importation, and goods cleared for home use ex-warehouse.

Imports statistics do not include personal luggage, but parcels of dutiable goods are included in the statistics.

**COUNTRIES TO WHICH IMPORTS AND EXPORTS ARE CREDITED.**

Imports are classified as received from the countries of origin.

Exports are credited to countries of final destination.

**METHOD OF ASCERTAINING QUANTITIES AND VALUES OF IMPORTS AND EXPORTS.**

The statements of quantities and values are based on the declaration of importers and exporters and subsequently checked by the Customs. Where goods are entered by weight the quantities shown as imported (except in cases where duty is charged on the gross weight) and exported represent the net weight exclusive of packages, sacks, casks, etc., in which they may be contained.

The value of imports are exclusive of the amount of duty, and are “c.i.f.”; the values of exports are “f.o.b.” values, inclusive of export duty.

Imports by parcel post are not classified according to their nature but are separately recorded, and are entered according to value.

Timber ...	No concessions granted, only few licences to fell trees.	Nil	<p>The timber industry, a very small one, is chiefly carried on by the native sawyers and canoe makers who work in unreserved forests over which Government have no control.</p> <p>From the reserved forests, most of which at present are rather inaccessible, no large supplies of timber were obtained excepting from the Kambui Reserve at Kenema. Other reserves were practically untouched during the year and are still undeveloped.</p> <p>Native sawyers continue to work in unreserved forests to produce boards and small scantlings. Twenty-one licences were issued to cover these operations. In the reserved forests, Seventy-four licences were issued to fell trees for local use. The departmental out-turn of sawn timber amounted to 140,000 superficial feet.</p>

Fish abounds in the river Rokelle; but the catches are irregular owing to the fact that only surf boats with drag nets are used in connection with the industry. In various parts around Freetown, where there are tidal rivers, a fair quantity of fish is caught by setting traps with galvanized wire netting. Trammel nets have also been tried but unsuccessfully, although a kind of net made locally is used in some portions of the Southern Province in the same way as trammel nets.

## SUMMARY OF INDUSTRIAL DEVELOPMENT.

An Agricultural Station for the introduction and breeding of rice was opened in the Scarcies Area in 1934, with a view to developing an export industry in this product. Good results are being obtained from this station and successful rice are being multiplied and distributed. Owing to the rapid development of mining, and the change over of several thousands of labourers from farming to mining, an internal market for rice, which did not exist before, has come into existence. This market must be supplied before an export industry can be developed.

The Government Rice Mill Cline Town was completed in 1936 and the milling of rice was commenced.

The Taungya system of improving the natural forests is being continued in four forest reserves. An enumeration survey is in progress and exploitation has been successfully begun departmentally.

Generally, continued progress was maintained in the mining industry. Record productions were attained in all the minerals mined save platinum. The United African Company, Limited, gave up platinum mining early in the year and the field is now occupied by a few individuals only.

All gold came from alluvial sources.

The Sierra Leone Development Company, Limited, mined the Marampa hematite deposit throughout the year. The ore met with ready market.

The Sierra Leone Selection Trust increased its diamond production and has now established Sierra Leone as one of the important diamond fields in the world. The Trust holds a monopoly in diamond.

An interest has again been shown in chromite but it is not yet being mined.
